PROFESSIONAL SUMMARY

Computer Science undergraduate at VIT-AP University with strong expertise in Data Structures & Algorithms, Java, and Full-Stack Development. Skilled in building scalable web applications and REST APIs using React, FastAPI, PostgreSQL, and SQLAlchemy. Passionate about software engineering, problem solving, and developing efficient software solutions.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, R

Frameworks/Libraries: React, FastAPI, SQLAlchemy, Chart.js

Databases: PostgreSQL, SQL

Tools: Git, GitHub, VS Code, Arduino IDE, Figma, Adobe XD

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs

EXPERIENCE

- Deloitte Australia Virtual Internship** 2025
 - Forage Virtual Experience Program*
 - Completed a Software Engineering virtual experience simulating real-world consulting projects.
 - Applied object-oriented programming, debugging, testing, and software engineering principles to solve client problems.

PROJECTS

- Smart Expense Tracker React, FastAPI, PostgreSQL, SQLAlchemy, Chart.js** 2026
 - Designed and developed a full-stack expense management application using React, FastAPI, PostgreSQL, and SQLAlchemy.
 - Built RESTful APIs supporting complete CRUD operations with efficient backend architecture and database integration.
 - Implemented search functionality, category-based filtering, and expense history management for quick data retrieval.
 - Created interactive analytics dashboards using Pie and Bar charts with Chart.js to visualize monthly spending trends.
 - Integrated PostgreSQL database with SQLAlchemy ORM for secure, scalable, and optimized data storage.
 - Applied component-based architecture and responsive UI design to improve user experience and maintainability.
- Smart Air Quality Monitoring System ESP32, IoT, ThingSpeak** 2025
 - Developed an IoT-based air quality monitoring system using ESP32 and multiple environmental sensors.
 - Collected real-time air quality parameters including gas concentration, temperature, and humidity.
 - Integrated the ThingSpeak cloud platform for live sensor data visualization, monitoring, and storage.
 - Implemented automated email alerts using Google Apps Script when air quality exceeded predefined thresholds.
 - Designed a reliable monitoring solution for continuous environmental analysis with remote accessibility.
- Fake News Detection Using Neural Network Python, TensorFlow, NLP** 2024
 - Built a deep learning model using LSTM networks for binary classification of fake and genuine news articles.
 - Performed extensive NLP preprocessing including text cleaning, tokenization, stop-word removal, stemming, and padding.
 - Utilized word embeddings and sequence modeling techniques to improve contextual understanding of news content.
 - Applied feature engineering and optimized model training to achieve better prediction performance.
 - Evaluated model accuracy using appropriate classification metrics and confusion matrix analysis.

EDUCATION

- VIT-AP University** Expected Graduation: 2027
 - Bachelor of Technology in Computer Science and Engineering* CGPA: 7.94/10
- Sri Chaitanya Junior College** 2021 – 2023
 - Intermediate (MPC)* 86%
- Sri Chaitanya School** 2021
 - School* 100%

CERTIFICATIONS

- Claude 101 – Anthropic Education** Jun 2026
- Hashgraph Developer Course – The Hashgraph Association** Feb 2026
- AWS Academy Graduate – Cloud Architecting** Oct 2025
- AWS Certified Cloud Practitioner** Sep 2025
- Oracle AI Foundations Associate** Sep 2025
- IBM – Generative AI Fundamentals** Jun 2025

LEADERSHIP & ACTIVITIES

- Design Team Member – Machine Learning Club, VIT-AP University.
- Participated in technical workshops, coding contests, and collaborative software development activities.
