

# SAILU CHITTALA

+91 8125726839 | chittalasailu02@gmail.com | github.com/ChittalaSailu | linkedin.com/in/chittalasailu

## PROFESSIONAL SUMMARY

Computer Science undergraduate at VIT-AP University with strong foundations in Java, Python, SQL, Data Structures Algorithms, and Object-Oriented Programming. Experienced in designing and developing full-stack applications using React, FastAPI, PostgreSQL, SQLAlchemy, and REST APIs. Skilled in building scalable, secure, and high-performance software solutions, debugging applications, and collaborating with cross-functional teams to deliver reliable software. Proficient in Git, Postman, and modern software development practices. Passionate about solving real-world problems through software engineering and continuously learning emerging technologies to build innovative digital solutions.

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, SQL, JavaScript, C

**Backend Development:** REST APIs, FastAPI, SQLAlchemy, JSON

**Cloud & DevOps:** AWS (EC2, S3, IAM), Docker (Basic), CI/CD (Basic), Linux (Basic)

**Databases:** PostgreSQL, MySQL, SQLite

**Frameworks/Libraries:** FastAPI, SQLAlchemy, Chart.js, React

**Tools:** Git, GitHub, Postman, VS Code

**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Unit Testing

## EXPERIENCE

- Deloitte Australia Virtual Internship** 2025
  - Forage Virtual Experience Program*
  - Completed a Software Engineering virtual experience focused on solving real-world business and technology challenges.
  - Applied object-oriented programming, debugging, testing, and software engineering best practices to solve real-world business problems.
  - Strengthened analytical thinking, problem-solving, teamwork, and professional communication through practical consulting tasks.

## PROJECTS

- AI-Powered Data Analytics Platform Python, Databricks, PySpark, SQL, Machine Learning** 2026
  - Developed scalable ETL pipelines using Databricks, PySpark, and SQL for efficient data extraction, transformation, and loading.
  - Automated data ingestion, cleansing, and preprocessing workflows for structured datasets.
  - Optimized SQL queries and PySpark transformations to improve data processing performance and reliability.
  - Designed scalable data processing workflows using PySpark and SQL while ensuring efficient and reliable data pipelines.
  - Used Git and GitHub for version control while integrating analytics dashboards for data visualization and reporting.
- Smart Expense Tracker React, FastAPI, PostgreSQL, SQLAlchemy, Chart.js** 2026
  - Developed a secure full-stack expense management application using React, FastAPI, PostgreSQL, and SQLAlchemy following modular software design principles.
  - Designed and implemented RESTful APIs supporting CRUD operations with optimized SQL queries and efficient database integration.
  - Implemented search, category-based filtering, and expense history management for efficient data retrieval and reporting.
  - Debugged backend APIs and validated endpoints using Postman to ensure reliable application performance.
  - Integrated PostgreSQL using SQLAlchemy ORM for scalable data storage and transaction management.
  - Created interactive dashboards using Chart.js to visualize spending trends and support data-driven decision making.
  - Used Git and GitHub for version control while following modular and maintainable development practices.
- Fake News Detection Using Neural Network Python, TensorFlow, NLP** 2024
  - Developed an LSTM-based deep learning model using TensorFlow to classify fake and genuine news articles.
  - Performed NLP preprocessing including text cleaning, tokenization, stop-word removal, stemming, and sequence padding.
  - Automated dataset preprocessing and model training using Python scripts for efficient experimentation.
  - Utilized word embeddings and sequence modeling techniques to improve contextual understanding of textual data.
  - Evaluated model performance using accuracy, precision, recall, F1-score, and confusion matrix analysis.

## EDUCATION

- VIT-AP University** Expected Graduation: 2027
  - Bachelor of Technology in Computer Science and Engineering* CGPA: 7.94/10
- Sri Chaitanya Junior College** 2021 – 2023
  - Intermediate (MPC)* 86%
- Sri Chaitanya School** 2021
  - Secondary School* 100%

## CERTIFICATIONS

- Claude 101 – Anthropic Education** Jun 2026
- IBM – Generative AI Fundamentals** Jun 2025
- Oracle AI Foundations Associate** Sep 2025
- AWS Certified Cloud Practitioner** Sep 2025
- AWS Academy Graduate – Cloud Architecting** Oct 2025
- Hashgraph Developer Course – The Hashgraph Association** Feb 2026

## LEADERSHIP & ACTIVITIES

- Collaborated with cross-functional student teams to design user interfaces and contribute to technical initiatives within the Machine Learning Club.
- Participated in technical workshops, coding contests, and collaborative software development activities.
